

**Project
Update**

Anchorage Neighborhood Health Clinic

Contractor: Roger Hickel Contracting Inc.

Scope of Work: The new three-story Anchorage Neighborhood Health Center was constructed by Roger Hickel Contracting Inc. in midtown Anchorage.

The building construction began in early March 2011 by thawing the ground with heat hoses and blankets so excavation could begin early. This facilitated the building to be closed in before the following winter.

The project, which includes a new dental center and operatory as well as ample parking and new landscaping, was completed on time and within budget in the summer of 2012.
